About Me

Software Engineering student with hands-on experience building AI-powered tools and data analysis applications using Python. Focused on LLM integration, prompt engineering, and building practical developer tooling. Comfortable working independently from idea to working product. Seeking an AI/LLM-focused internship to contribute to real-world product development.

Education

Varna University of Management

BSc Software Engineering

Sep 2025 – Present

Varna, Bulgaria

- **Languages:** Python, C#, JavaScript, HTML, CSS
- **Concepts:** OOP, SDLC, Requirements Engineering, Software Design, Agile
- **Tools:** Git, Visual Studio, PyCharm, Jupyter Notebook

Certifications

IBM | Python for Data Science, AI & Development [View Badge](#)

Feb 2026

- Data analysis and manipulation with pandas & NumPy; working with APIs and JSON data
- Python fundamentals, data structures, and applied problem solving

IBM | Fundamentals of AI Agents Using RAG and LangChain [View Certificate](#)

Mar 2026

- Built RAG-based applications using LangChain, embeddings, and vector stores
- Designed AI agent pipelines with tool use and memory for multi-step reasoning tasks

Projects

Unitra | Python • Flask • pywebview • HTML/CSS/JS • LLM APIs • pytest

- AI-powered desktop application that automatically generates Python unit tests from source code.
- Built an AST-based analysis engine to extract function signatures, docstrings, and type hints for structured prompt construction.
- Designed the LLM integration layer with prompt engineering to produce syntactically valid, runnable pytest test cases.
- Packaged as a desktop app using pywebview with a Flask backend and a custom HTML/CSS/JS frontend.

PyGlow | Python • PySide6 • Pygments • Local LLM

- Lightweight Python code editor built from scratch with syntax highlighting (Pygments), search/replace, auto-indent, and multiple themes.
- Integrated optional local LLM-based code autocomplete triggered inline while editing.
- Designed a modular plugin-style architecture with persistent user settings across sessions.

Applied Data Science | Python • pandas • seaborn • Jupyter Notebook

- Conducted exploratory data analysis on real estate pricing, retail sales, and student performance datasets.
- Cleaned and transformed raw datasets; built visualizations to surface key trends and correlations.
- Delivered structured Jupyter Notebook reports with reproducible analysis and documented findings.

Technical Skills

Programming Languages: Python, C#, JavaScript, HTML, CSS

Frameworks & Libraries: Flask, pandas, NumPy, PySide6, pywebview, Pygments, LangChain

Tools & Platforms: Git, PyCharm, Jupyter Notebook, pytest, Visual Studio

AI / LLM: LLM Integration, Prompt Engineering, RAG, Embeddings, Agent Design, AST Analysis

Concepts: OOP, SDLC, Requirements Engineering, Software Design, REST APIs

Spoken Languages: Ukrainian — Native • English — B2 (C1 Reading)
